Authoritative Multi-Format Content

Different types of content are needed by different users depending on their assignment or research task. ProQuest One Education includes content to support multiple users, whether it's an undergraduate looking for an assignment topic, a PhD student putting together a literature review, or a professor looking for classroom resources.

Over 1,000 full text scholarly journals allow users to stay on top of the latest issues in the field with the current scholarship from the most important publications such as *Harvard Educational Review*, *YC Young Children*, and *Language Teaching*.

More than **5,500 videos** of teaching demonstrations, lectures, documentaries, and footage of students and teachers in actual classrooms show the behavior, tone, facial expression, and body language that define effective teaching.

A collection of over **12,500 books** for comprehensive, in-depth study including over 500 CHOICE and RCL award winners and titles from major publishers such as Bloomsbury, Routledge, and SUNY Press.

ProQuest ONE EDUCATION

Unique content from over **110,000 dissertations** and these helps users make new discoveries by tapping a vast amount of early scholarly content and cutting-edge thought.

Over 200,000 specially selected education-related articles from a variety of well-known newspapers such as New York Times, The Guardian, Globe and Mail, and USA Today give an accessible way to introduce students to topics and show theories and ideas in their broader context.

Users can explore education policies and their impact with **160,000 research reports** from think tanks, governments, research organizations, and advocacy groups including the Brookings Institution, US Department of Education, and the World Bank.

The content from **ERIC**, the world's most widely used index to educational-related literature, offers over one million records of journal articles, research reports, curriculum and teaching guides, conference papers, and books.

Education-Specific User Experience

A logical and intuitive layout for studying the discipline

The unique interface has been specially created to meet the needs of those studying, researching, or teaching education. It is organized and structured to align with common areas of research and study, with content grouped together in a way that is intuitive and logical to those in the discipline. Combined with specialized indexing based on the internationally recognized ERIC thesaurus, it allows users to find more of the information they need more quickly and with more precision.

The screenshot displays the ProQuest One Education homepage. At the top, there is a navigation bar with a menu icon on the left and user icons on the right. Below this, the site title "ProQuest One Education" is centered. A secondary navigation bar includes links for "Basic Search", "Advanced Search", "Publications", "Browse", and "Change databases". The main search area features a large search bar with the placeholder text "Enter search terms..." and a search icon. Above the search bar are buttons for "All", "Scholarly Journals", "Books", "Videos & Audio", "Dissertations & Theses", and "All source types". Below the search bar are filters for "Full text" and "Peer reviewed", along with a "Search tips" link. The page is divided into several sections: "Explore Trending Topics in Education" with a row of topic tags; "Areas of Research" with a grid of six research areas, each with a representative image and title; "Browse Titles" with a grid of three content categories: Journals, Books, and Videos; and "Theorists" with a horizontal carousel of key theorists, each with a portrait and name.

Topic Pages provide one stop shops for ideas, concepts, and key study areas

Topic Pages bring together a curated selection of relevant articles, videos, books, dissertations and more, to provide students and researchers with a convenient, all-in-one perspective on a topic and help faculty create course materials for assignments and discussion. There are four main types of Topic Pages:

1. Subjects

Make it easier for users to identify topics for future projects, understand common concepts more deeply, and explore connected ideas. These pages are categorized into nine specializations:

- Administration & Leadership
- Curriculum & Instruction
- Diversity & Inclusion
- Education Technology
- Evaluation & Assessment
- Psychology & Counselling
- Research Concepts
- Student Life
- US Education Policy

2. Theories

Allow users to explore the key theories underpinning the discipline, including their formation, and how they apply to practical teaching methods. Examples include Constructivism, Cognitivism, and Sociocultural Theory.

3. Theorists

Explores the thinkers that have shaped the discipline and influenced teaching methods and education policy and laid the groundwork for future theoretical developments. Includes Jean Piaget, Lev Vygotsky, and John Dewey.

4. Teaching Methods

Staying up to date with the latest teaching methods makes it easier for students and researchers to understand the relationship between theory and real-world application. Examples include: Scaffolding, Direct Instruction, and Game Based Learning.
