

A DATASHEET

Trends and Policy: U.S. Environment

Explore how human interaction with the environment is changed by government policies.

Trends and Policy: U.S. Environment merges content from a variety of sources and presents them in a unique interface designed to connect various environmental policies of the United States to their trending results. Included in this collection are all environment-related public laws and hearings, Legislative branch reports, Executive branch reports and data, press releases, and present-day and historical news articles. The design of the product includes timelines, contextual topic pages for laws, concepts, and events, and rekeyed statistical content that allows researchers to work with the data.

Currently, researchers must use multiple disparate tools to find all of the essential executive and legislative content on U.S. environmental policy. Statistical data relevant to environmental policy is often difficult to find, extract and use in research and in reports. The emphasis of this collection is not focused on environmental science, but in bringing together primary source content relevant to U.S. environmental policy with statistics and data from federal government sources and delivering this essential material within the context of topic pages, timelines, and newspaper articles.

ProQuest
Part of **Clarivate**

With Trends and Policy: U.S. Environment, students and researchers can:

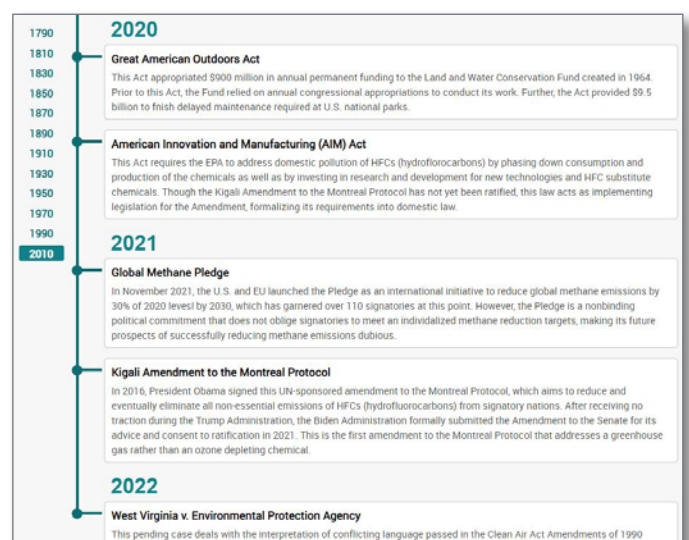

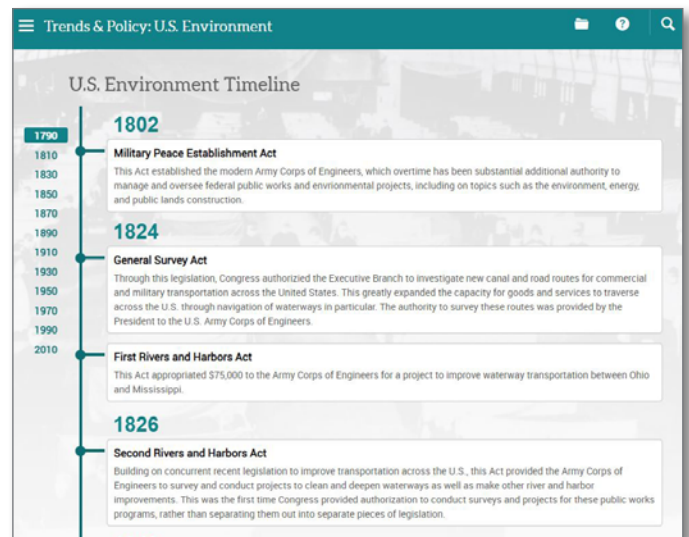

- **Explore** environmental policies through topic pages organized according to concepts, events, and laws; and timelines that provide a linear perspective on the development of policy
- **Connect** U.S. government policy with its impact and consequences by cross-searching with news articles, reports and other data sources for greater context and understanding
- **Analyze and gain insight** from these various information sources to draw independent conclusions resulting in better research and learning outcomes

Curated Topic Pages cover such areas as:

- Agriculture and the Environment
- Clean Air Act
- Climate Change
- Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)
- Endangered Species Act of 1973
- Environmental Decision-Making
- Environmental Social Governance (ESG)
- Fracking and the Production of Oil and Gas
- Native Americans, Natural Resources, and the Environment
- Party Politics and the Environment
- Pollution and Health
- Public Lands

This collection provides critical insight and information across disciplines including:

- Economics
- Environmental Studies
- History
- Legal Studies and Public Policy
- Political Science
- Sociology and Social Justice
- Urban Planning
- And more
